PROFESSIONAL PROFIL

Third-year Computer Science student specializing in Software Engineering at ESMIA Innovation, seeking a six-month internship starting in December 2026. I have completed more than 12 academic projects, gaining practical experience in web application development, REST API design, and database management. I am eager to contribute my skills to real-world projects and collaborate with a software development team.

EDUCATION

2026–2027 | Bachelor's Degree in Computer Science — Software Engineering · ESMIA Innovation (ongoing)

2025–2026 | Second Year, Bachelor's Degree in Computer Science · ESMIA Innovation

2024–2025 | First Year, Bachelor's Degree in Computer Science · ESMIA

2024 | High School Diploma, OSE stream · Lycée Nanisana

TECHNICAL SKILLS

Programming language : Java, Python, JavaScript, PHP, SQL, HTML/CSS

Frameworks : Spring Boot, Django, Laravel, FastAPI, React, Thymeleaf, Bootstrap 5

Datebases & Design : PostgreSQL, MySQL, SQLite, UML, MERISE

Tools & environnements : Git, GitHub, Docker, Postman, Linux / WSL2

SELECTED PROJECTS

Automated Virtual Football Analytics – Personal Project | Python, FastAPI, SQLAlchemy, Playwright, PostgreSQL | 2026

- Automated the collection and storage of 30 consecutive matches in PostgreSQL using Playwright.
- Designed a FastAPI, REST API with 65 declared endpoints across 13 business modules.
- Personal project currently under development and functional validation.

Electricity Outage Management Platform in Madagascar | React, FastAPI, PostgreSQL | 2026

- Designed a REST API with 72 endpoints, organized into business modules using a service and repository architecture.
- Developed a platfom for reporting and tracking power outages, with prediction, optimization, and notification modules currently undergoing validation.

Textile Order and Production Management System | Spring Boot, PostgreSQL, Thymeleaf | 2026

- Developed an application to track customer orders and the production workfolw(cutting, sewing, and finishing)
- Designed a REST API with 36 route declarations, 9 REST controllers, and 8 JPA entities for business data management.

Student Management Application | Python, Django, SQLite, Bootstrap 5 | 2026

- Developed a student management web application with a responsive interface and full CRUD operations(create, read, update,and delete)
